

RGB+Line WEC-2 - QUICK START GUIDE

CONNECTING TO THE CONTROLLER

- POWER your WI-FI Effects Controller & light string, or display
- OPEN up your WI-FI network settings on your wireless device
 - SELECT the "wec-xxx" network.
 - OPEN up your web browser (Chrome, Safari, etc.)
 - ENTER **192.168.2.2** into the web address bar
- INTERACT with the WEC-2's blue web user interface (UI) to control your display.

PLEASE READ THE
 RGB+WEC-2 USER GUIDE FOR
 UI TIPS & GROUPING INSTRUCTIONS
 . inleonUSA.co controller

SETTING LIGHTS

- SELECT 'Configuration'
- SCROLL to 'Lights per String'
- TYPE the number of lights connected UP
- SELECT 'Save'

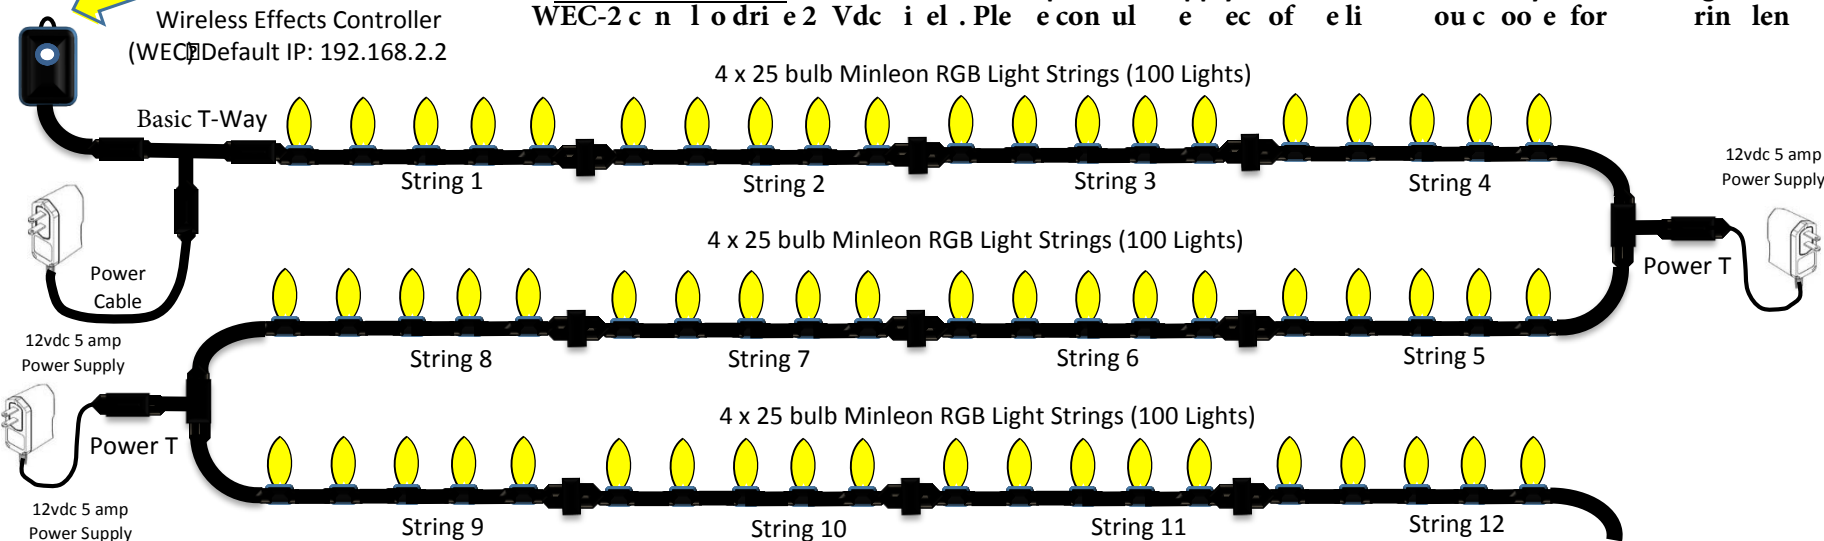

Any Wireless Enabled Device

NOTE: A total of 300 lights can be connected in the GPMMPDHMBZP Refer to the

RGB+LINE ONLINE TUTORIALS FOR BEST PRACTICES

IMPORTANT NOTE: A Power-T and 5-amp Power Supply must be added for every 100 12Vdc lights. The WEC-2 cannot drive 2 Vdc in line. Please consult the spec of the manufacturer for further information.
