### **Live Your Light!**

Messing Ho

# REPEATER

The MeshTek Bluetooth repeater acts as a long range extender required in large projects or for extended control range requirements of over hundreds of meters. With a simple app based commissioning, the repeater becomes the part of the networked devices under the network, further enhancing the range of the Bluetooth mesh. It also has built-in real time scheduling features required for scheduling MR16, PAR36, and G4 bipin bulbs.

MESHTEK®

CONTAIN FCC ID:2AEHU-MESHTEK-H52 CONTAIN IC:20069-MESHTEKH52 Designed in USA, Assembled in China. 5/N:DX211938RP00262
